EDUCATION

B.Sc in Computer Science and Engineering, Uttara University

2020 – 2024

EXPERIENCE

Software Engineer Intern *Manush Tech*

Nov 2025 – Apr 2026

- Built a full-stack Asset Management System using React, Express.js, PostgreSQL, Prisma, Redis and Docker to streamline asset tracking workflows
- Designed a normalized relational schema across **14+ entities** including users, roles, permissions, assets and departments
- Implemented RBAC with dynamic permission configuration for module-level access control across multiple user roles
- Developed asset lifecycle management, assignment workflows and audit logging for operational tracking and history management
- Built analytics dashboard with real-time asset valuation, status distribution and department-wise insights
- Contributed to a Support Flow System built with React, NestJS, PostgreSQL and Prisma for issue and ticket management
- Implemented dynamic custom field chaining with conditional visibility configuration to improve ticket creation usability
- Developed issue categorization and automated distribution modules for structured ticket routing workflows

PROBLEM SOLVING

- Codeforces: [FailX](#), **Max-Rating: 1600**, 1200+ solved
- LeetCode: [sarifulsarker19](#), 100+ solved
- AtCoder: [sariful](#), 100+ solved

ACHIEVEMENTS

- **ICPC Asia Dhaka Regional** 2022 (GUB) | (preli): 2022, 2023
- **IUPC: AUST '22, SUST '23, IUT '24**
- UU Intra-University Contest 2024: **2nd**
- **Meta Hacker Cup 2024**: Ranked: 4112 (Round 1), **2048** (Round 2)

PROJECTS

Asset Management Admin Panel [\[GitHub\]](#) [\[Live\]](#)

Built a role-based asset management dashboard with employee, department, designation, brand and vendor management, asset assignment workflows, status tracking and asset history management.

Tech Stack: React, CSS, Axios, Mantine UI

Asset Management Backend: [\[GitHub\]](#)

Developed REST APIs for asset lifecycle management with RBAC, audit logs, authentication, employee-wise tracking and PostgreSQL schema design.

Tech Stack: Express.js, PostgreSQL, Prisma, Docker

Support Flow System:

Built an internal ticket tracking platform with dynamic custom fields, issue categorization and project-wise workflow management for support teams.

Tech Stack: React, NestJS, PostgreSQL, Docker

SKILLS

- Languages: C++, JavaScript, TypeScript
- Frontend: HTML, CSS, Tailwind CSS, React.js, Redux
- Backend: Node.js, Express.js, NestJS
- Database&ORM: PostgreSQL, MySQL, Prisma, SQL
- Tools: Docker, Redis, Git
